

Splinter meeting (Wed May 22 14h00 – 15h30)

File formats and conversion tools for local survey observations

General scientific objectives :

- Archive local tie data sustainably
- Allow tie survey data to be processed by other groups

Specific objectives of this meeting:

- to review formats used by the software packages to process local tie observations and their specificities.
- to discuss the use of working on a specific exchange format vs. conversion tools
- to enumerate all different kinds of observations to be archived

Program of the afternoon

- Quick overview of the objectives of this meeting (previous slide)
- Presentation of the software packages and data format (5-8 min. max per presentation)
 - Charles Geoghegan, *StarNet*
 - Valérie Michel, *Geolab*
 - James Long, *Havago*
 - Pierguido Sarti, *Clement*
 - Ryan Ruddick, *Axis*
 - Roberto Lanotte, *GSMat*
 - Michael Lösler, *HEIMDALL*
- Discussion
